About This Game

In Coffee VendoR you play as an employee of Auto Coffee™ a company responsible for making the first auto dispensing coffee vending machine. You play as a vendor inside the machine, making coffee for customers.

While at work you're a slave to Auto Coffee™ but when you go home, that's YOU time! Spend your money however you want. Want a new couch? Get it! Want a sick VR headset and some new games? Get them... Play VR in VR!

If you boil this game down it's basically a series of mini games just like most VR games. But I feel as though everyone should enjoy these mini games for FREE!

Version 1.3.1 (29 April 2015):

Hello!

We've just posted a quick update fixing some issues. Here is the changelog:

- fixed a crash on visiting scavenge locations
- fixed a bug that allowed starting custom scenario with way too many survivors
- fixed bugged church blockade

. Update 16 - Russian and German:

What's New?

- Translated the game into Russian and German.
- Added some giant black pillars in the last level, to help players figure out where to go next.
- Also optimized that level by only loading half of it at the start, then loading the rest as you play through it.

What's Next?

I've been playing a lot of Bloodborne lately, and I love their level designs. They're so interesting to explore, and also suspenseful and terrifying.

So I'm working on a new level for after the tutorial, with a couple new mini bosses, some hidden things, and the goal to make you afraid of what's around the next corner. :)

Also going to re-arrange the other levels, to get away from the wave design (like Conan or God of War), and switch to more of a Dark Souls design. Same amount of enemies, but fought in a larger level.
